## Remarks

The results of this poll have been interactively visualized in the link below:

<https://www.surveycenter.io/election2021/20210617/en/>

This is an interactive platform detailing the results of every question, distinguished by gender, age group, location, and education in a bar chart.

For each question, there is a bubble chart (consisting of many small circles), detailing the respondents' information. Each circle represents a single respondent and by clicking on it, you can find the complete answer set for that particular respondent. The color coding is consistent between the bubble chart and bar chart for easy comparison.

## Methodology

- Telephone interviews were conducted between June 15 and June 17, 2021, with a random sample of 1400 Iranians aged 18 and older living in Iran. Native Farsi speakers conducted the interviews during daylight hours.
- The proportional two-stage sample includes respondents from every province. Provinces have been sampled based on their population.
- Based on the sample, there is a 95% confidence that the margin of sampling error is  $\pm 2.7$  percentage points (likely voters excluded).
- Results are weighted by gender, age, and location (urban vs. rural areas) based on the Iranian national census of 2016 and 2018 statistical yearbook.
- Rates of respondent candor and reliability were appraised by experienced interviewers. Forty-one persons found to be lacking in these areas were removed from the sample.
- This poll was carried out by Stasis for Iran International TV.
