

**Iran's presidential election in 2024 is shaping up to be a three-way race. Iranians have contradictory views of President Raisi's performance. Most Iranians oppose the government's approach to women's veiling practices.**

**Survey  
Analytical and Technical Report  
June 12 – 21, 2024**

## Main Findings

The June 28 presidential election will be a close three-way race between two Principlist candidates, hardliner Saeed Jalili and moderate Principlist Mohammad Bagher Qalibaf, and one Reformist candidate, Masoud Pezeshkian. Mr. Jalili leads with 27 percent, followed by Mr. Pezeshkian with 25 percent, and Mr. Qalibaf with 17 percent. Stasis’ likely voter model predicts a 46 percent turnout as of June 21, seven days before the election. The composition of the likely voter model is discussed further in remark section.

These findings are based on a representative poll conducted by Stasis Consulting between June 12 and June 21, 2024, among 1,223 respondents aged 18 and older living in Iran.

According to this poll, Iranians have contradictory views of President Raisi’s performance during the almost three years that he was in office as the president of the Islamic Republic. His job approval is at a record high, standing at 66 percent. In our last survey in the run-up to Iran’s February 2024 Parliamentary elections, only 32 percent of the respondents approved of his job performance as president ([link](#)).

Although President Raisi’s overall approval is high, Iranians disapprove of his handling of specific issues, such as youth concerns and the economy in general. Forty-one percent approve of his approach to the economy, and 39 percent give him credit for his handling of youth issues.

Iranians also do not believe President Raisi’s death will cause any challenges for the country. Just 14 percent of respondents say President Raisi’s death will cause any challenges for the country, as opposed to 62 percent who have a different view, including 55 percent of respondents who believe his death will cause very little or no challenge for the country.

Based on this survey, the majority of Iranians are against the way the government is dealing with the hijab issue. Sixty-eight percent say they oppose the government imposing strict penalties, such as fines or imprisonment, upon women who do not wear their hijab in public. Moreover, 55 percent of the respondents say they are against the way that the Guidance Patrol (in Farsi: Gasht-e-Ershad) treats women who are noncompliant with compulsory hijab. In response to a question measuring Iranian public opinions of a hijab-optional policy, 54 percent expressed agreement.

Most Iranians are also in favor of the idea of holding a national referendum on key issues. Seventy-seven percent agree with the statement that the people of Iran should have the power to call a national referendum to resolve differences on important economic, political, social, and cultural matters, while just 10 percent disagree.

## Iran’s presidential election in 2024 is shaping up to be a three-way race.

Iran’s presidential election in 2024 is shaping up to be a three-way race. Recent survey results indicate tight competition between the main candidates: hardliner Saeed Jalili, Reformist Masoud Pezeshkian, and moderate Principlist Mohammad Bagher Qalibaf. The poll shows that 27 percent of likely voters (n=566) support Jalili, followed by Pezeshkian at 25 percent, and Qalibaf at 17 percent.

### Iran’s 2024 Presidential Election: Candidates (%) among Likely Voters

Regardless of the likelihood of your participation in the upcoming presidential election, if you wanted to vote, of these names who have been qualified by the Guardian Council, who would you choose? Responses among likely voters n = 566

## Election Turnout

Stasis Consulting predicts a higher voter turnout than in previous elections, estimating at least 46% participation. As of June 21, nine percent of the electorate is still undecided, while 45 percent do not plan to participate in the election.

## Iran's 2024 Presidential Election: Turnout

Likely voter - Here, Stasis uses its experimental likely voter model combining the results of several questions to evaluate if respondents could be clustered as likely voters in Iran's 2024 presidential elections.

Stasis

surveycenter.io  
June 12-21, 2024

### Awareness of the election date among Iranians is higher than the previous Majlis election.

According to this survey, 51 percent of citizens know exactly when the presidential election will be held (June 28, 2024). This is a 23-percentage point improvement in crucial civic awareness among Iranians over the last parliamentary election, held four months ago.

### Most Iranians believe the presidential election will be competitive.

Fifty-seven percent of respondents in this survey believe that the 2024 presidential election will be competitive, as opposed to 27 percent of interviewees who have a different view.

### Iranians have contradictory views on President Raisi's performance.

As expected, Iranians are conflicted about President Raisi's performance after his tragic death in May. In every survey conducted by Stasis since President Raisi took office, Iranians have shown overall disapproval of his performance. Just three months earlier, only 32 percent of Iranians expressed approval of Raisi's performance as president ([link](#)). However, in this survey, 66 percent approve of his overall job performance, as opposed to only 26 percent who disapprove. The approval of the Iranian president's job performance over time has been visualized in this [link](#).

## President Raisi's Job Approval

You might have heard that President Raisi died in a helicopter crash last month. Generally speaking, did you approve or disapprove of the way Mr. Raisi was handling his job as president when he was in office?

Stasis

surveycenter.io  
June 12-21, 2024

### President Raisi's approval across different issues

In this survey, we further investigated President Raisi's approval rating across different issues, such as the economy, youth concerns, foreign policy, dealing with corruption, and freedom or political liberties. Although his overall job approval is posthumously high, Iranians have relatively lower opinions of his performance on specific issues. Among the top five issues, Raisi only achieved majority approval for

Survey June 12 – 21, 2024

his handling of corruption. Fifty-six percent of respondents approve of Raisi’s approach to corruption, followed by foreign policy (43 percent), the economy in general (41 percent), youth issues (39 percent), and freedom or political liberties (33 percent). Moreover, 56 percent of respondents disapprove of his performance on the economy in general and 54 percent disapprove of his approach to youth issues.

### President Raisi’s Job Approval – Different Issues

For each issue, please let me know whether you approve or disapprove of the way Mr. Raisi was attempting to resolve this issue as president

Stasis

surveycenter.io  
June 12-21, 2024

### Iranians do not see Raisi's death causing any challenges for the country.

Just 14 percent of Iranians say President Raisi's death will cause challenges for the country, as opposed to 62 percent who have a different view, including 55 percent of respondents to this survey who believe his death will cause very little or no challenge for the country. Respondents with a college education (n=368) and those who live in urban areas (n=959) are more likely to say that the president's death will not cause many or will cause no challenges for the country, with 71 percent and 62 percent, respectively.

### President Raisi’s Death and Challenges for the Country

In your opinion, will President Raisi’s death cause any challenges for the country or not?

Stasis

surveycenter.io  
June 12-21, 2024

### Most Iranians oppose the government’s approach to women’s veiling practices.

The majority of Iranians are against the way the government is dealing with the hijab issue. Sixty-eight percent say they oppose the government imposing strict penalties, such as fines or imprisonment, upon women who do not wear their hijab in public. Moreover, 55 percent of the respondents say they are against the way that the Guidance Patrol (in Farsi: Gasht-e-Ershad) treats women who are noncompliant with compulsory hijab. In response to a question measuring Iranian public opinions of a hijab-optional policy, 54 percent expressed agreement.

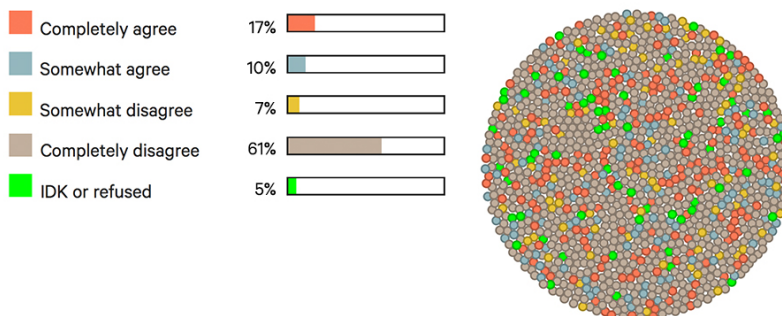

#### Hijab and Impose Penalties

Survey June 12 – 21, 2024

Iran’s government has tried to impose strict penalties, such as fines or imprisonment, upon women who do not follow compulsory hijab by refusing to wear a veil in public. Sixty-eight percent of Iranians say they oppose the government’s strict penalties for women who do not wear the hijab in public, including 61 percent who completely disagree.

### Hijab and Impose Penalties

To what extent you agree or disagree with this statement:  
The government should impose strict penalties such as fines or imprisonment upon women who do not wear their hijab in public spaces.

Stasis

surveycenter.io  
June 12-21, 2024

The level of disagreement with the government on this issue is consistent across two main demographic groups, age and gender. However, college-educated Iranians or those residing in urban areas are more likely to express their disagreement.

### Hijab and Impose Penalties – Based on Location

To what extent you agree or disagree with this statement:  
The government should impose strict penalties such as fines or imprisonment upon women who do not wear their hijab in public spaces. n (urban)=959 / n (rural)=264

June 12-21, 2024

Survey June 12 – 21, 2024

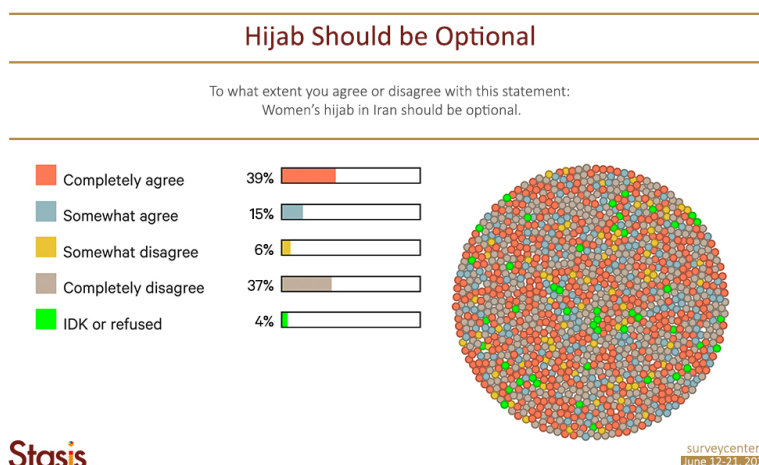

## A majority of Iranians dislike the Guidance Patrol (Gasht-e-Ershad) and prefer optional hijab.

According to this survey, 55 percent of respondents say they are against the way the Guidance Patrol is handling its job of dealing with women who do not comply with compulsory hijab. Those who agree with the Guidance Patrol's role consist of 37 percent of the population.

## Optional Hijab

In response to the question measuring Iranians' agreement or disagreement with optional hijab, 54 percent agree that hijab should be optional vs. 43 percent who disagree. Educated Iranians or those residing in urban areas are more likely to express their agreement.

## Analysis of Hijab opinions among the candidates' supporters

Among those who prefer the hardliner candidate, Mr. Jalili, 58% approve of the Guidance Patrol as opposed to 35% who disapprove. Just 31% of Jalili's supporters approve of a hijab-optional policy vs. 68% who believe in mandatory hijab. His supporters are more split on the question of strict penalties like fines or imprisonment for women who do not follow compulsory hijab rules (41% are in favor while 57% oppose strict penalties).

Respondents who favor the more moderate conservative Speaker Qalibaf for president have softer views on the government's approach to hijab policing. Of Mr. Qalibaf supporters, 53% approve of the Guidance Patrol job vs. 43% who disapprove. Moreover, 47% approve of a hijab-optional policy as opposed to 51% who prefer a compulsory mandate. Among this camp, 40% of respondents believe that the government should impose strict penalties upon women who do not veil in public (56% disagree).

Among those of Mr. Pezeshkian supporters, just 23 percent approve of the Guidance Patrol as opposed to the 72 percent majority who disapprove. A significant majority of Pezeshkian voters are in favor of a hijab-optional policy while only 24% believe in mandatory hijab. against the optional hijab. Finally, 82 percent are against imposing strict penalties on women who do refuse to veil (16% hold a different view).

## Hijab and Imposed Penalties

To what extent do you agree or disagree with this statement: Government should impose strict penalties such as fines or imprisonment upon women who do not wear their hijab in public spaces.

Stasis

surveycenter.io  
June 12-21, 2024

## Guidance Patrol

To what extent do you agree or disagree the way that the guidance patrol (in Farsi: Gasht-e Ershad) is handling its job dealing with women who do not comply with compulsory Hijab.

Stasis

surveycenter.io  
June 12-21, 2024

## Optional Hijab

To what extent do you agree or disagree with this statement: Women Hijab in Iran should be optional.

Stasis

surveycenter.io  
June 12-21, 2024

### Iranians are in favor of the idea of a referendum.

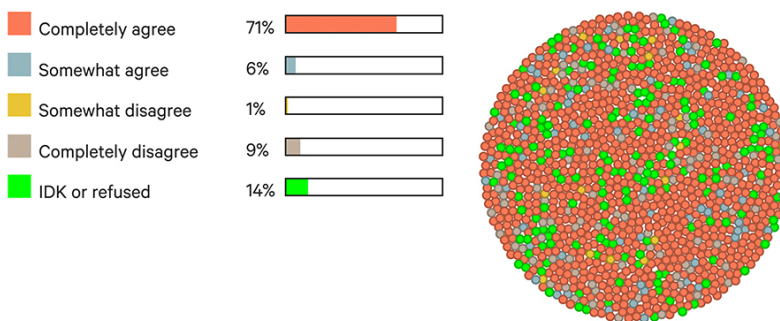

Most Iranians are in favor of the idea of a referendum, with 77% agreeing that in the case of important economic, political, social, and cultural matters, the people of Iran should have the power to call a national referendum to resolve differences. The level of strong

Survey June 12 – 21, 2024

majority agreement with the idea of a referendum is universal across different demographic groups. These results are comparable to our May 2021 survey, in which 81% of respondents were in favor of a referendum.

### Referendum

To what extent you agree or disagree with this statement: In the case of important economic, political, social, and cultural matters, the people of Iran should have the power to call a national referendum to resolve differences.

Stasis

surveycenter.io  
June 12-21, 2024

The majority of respondents, irrespective of their voting preferences say they support the idea of a referendum. There are greater degrees of enthusiasm for a referendum among the Qalibaf camp (85%) compared with the Pezeshkian and Jalili supporters (79% and 70%) respectively. Jalili supporters are more likely to oppose the idea (22%) than those in favor of another candidate (7%, opposition among Qalibaf and Pezeshkian supporters).

### Idea of a Referendum

To what extent do you agree or disagree with this statement: In the case of important economic, political, social, and cultural matters, the people of Iran should have the power to call a national referendum to resolve differences.

Stasis

surveycenter.io  
June 12-21, 2024

### Apart from the economy, youth concerns are the most important issue that a new president should focus on.

Thirty-nine percent of Iranians named youth concerns as the "most important" issue that a new president should focus on when taking office. This is followed by unemployment at 32 percent, the cost of living and inflation at 23 percent each, and affordable housing at 18 percent.

This was an open-ended question, and we asked respondents to consider issues beyond the economy. It was also a multi-response question, meaning that respondents could name more than one issue, resulting in the sum of responses exceeding 100 percent.

## Most Important Issues

Apart from the economy, what are the most important issues that a new president should focus on (multi-response and open-ended question)

### Iranians are nearly split on their support for the two major political groups in the country.

Thirteen percent of Iranians lean toward the Reformist party, which is 2 percentage points less than those who prefer the Principlists. In our February 2024 survey, the share of each group was 10 percent.

### Drug usage is thought to be quite common among Iranian youth.

The vast majority of Iranians (88 percent) believe that drug use is common among Iranian youth. Just 8 percent disagree.

### Iranian citizens say they are overtaxed.

Forty-seven percent of respondents believe Iranian citizens pay more taxes to the government than they should, as opposed to 37 percent who do not believe this statement is true. The difference among respondents to this statement is clearly associated with their level of education.

## Remarks

The results of this poll have been interactively visualized in this [link](#). This is an interactive platform detailing the results of every question, distinguished in a bar chart by gender, age group, location, and education.

For each question, there is also a bubble chart (consisting of many small circles), detailing the respondents' information. Each circle represents a single respondent; clicking on any given circle will generate the complete answer set for that particular respondent. The color coding is consistent between the bubble chart and bar chart for easy comparison.

Stasis uses our proprietary likely voter model, analyzing responses to different questions (Questions 13, 14, 16, and 26) to identify probable voters. Criteria for likely voters include a) knowing (exactly or approximately) the election date, b) saying that they are very likely to participate in the election, c) not saying "I don't know" or refusing to answer the question about the likelihood of their participation in the election, and d) mentioning that their participation might depend on some factors.

## Methodology

Survey methodology explained below:

- Telephone interviews were conducted between June 12-21, 2024, among 1,223 respondents aged 18 and older living in Iran. Native Farsi speakers conducted the interviews during daytime hours.
- The proportional two-stage sample includes respondents from every province. Provinces have been sampled based on their population.
- Out of 1,223 respondents in unweighted data, 78% live in urban areas and 22% live in rural areas. Additionally, the sample consists of 58% male and 42% female respondents. Seventeen percent fall into the 18-29 age group, 73% in the 30-64 age group, and 10%

Survey June 12 – 21, 2024

in the 65 and up age group. All provinces except Tehran are represented in the sample by no more than ±2% of their population share. The province of Tehran is underrepresented by 5.1% in this unweighted sample.

- Results are weighted by gender, age, location (urban vs. rural areas), and adjusted for Tehran’s province based on the Iranian national census of 2016, the 2018 statistical yearbook, and Iran’s Statistical Center demographic predictions for the year 2024.
- Based on the sample, there is a 95 percent confidence that the margin of sampling error is within ±2.8 percentage points.
- Rates of respondent candor and reliability were appraised by experienced interviewers. Fifty-eight persons found to be lacking in these areas were removed from the sample and are not included in the final sample or in this report.
- The response rate for this survey was 32.3%.

## More on Technical Report

The field study was conducted over telephone with a sample size of 1,281 Iranian adults, aged 18 and older living in Iran, between June 12-21, 2024. Among these respondents, fifty-eight were removed from the final results due to lack of honesty and candor. So, the total number of respondents are 1,223. Considering that the total population of Iranian adults is approximately 62 million people, this sample size is representative of the whole population of adult Iranians, with a 95% confidence level and ±2.77% margin of error (The Stasis methodology to conduct the telephone surveys is detailed in the survey methodology document).

The total number of responses recorded for all questions is 1,223.

The response rate for this study was 32.3%. Of the 3960 people we contacted, 1281 responded to the questionnaire. Another 58.8% of respondents said they prefer not to participate in the survey (2330 people), and 8.8% dropped the call in the middle of the survey (349 people). Additionally, the candor and reliability of respondents were appraised by the interviewers. fifty-three people were removed from the sample on these criteria. So, the total number of valid respondents in this survey is 1,228 people.

Response Rate		
	Percentage	Frequency
Successful	32.3%	1,281
Preferred not to participate	58.8%	2,330
Dropped the call in the middle of the survey	8.8%	349
Total	100.0%	3,960

STASIS weighted the respondents by gender, age group, location (rural vs urban), and province (Tehran vs. other provinces). The segmentation of demographic characteristics of the field study compared with the population are detailed in the table below.

Stasis typically does not weight its responses based on education. The main reason is that we are missing adequate data on this variable from the yearly Iran Census report.

The sample size for each variable before and after the weighting is executed is detailed in the table below:

Weighted Sample							
	Male	Female	Urban	Rural	Age: 18-29	Age: 30-64	Age: 65 plus
Percentage in unweighted Data	57.8%	42.2%	78.4%	21.6%	16.5%	73.6%	9.9%
Percentage in the Population	50.5%	49.5%	76.6%	23.4%	23.1%	67.9%	9.0%
Percentage in weighted Sample	49.2%	50.8%	78.3%	21.7%	23.3%	67.9%	8.9%

Survey June 12 – 21, 2024

The list of samples sizes for each province in the filed study is detailed below. As shown here, for all provinces but Tehran, there is a minor difference (less than 2 percent) between the sample size and its proportional population. The province Tehran under sampled by 5.1%.

We usually do not recommend weighting the data by province since the difference is minor and weighting technically increases the variance. However, in this survey since the province of Tehran unrepresented by more than 3 percent, the data adjusted for Tehran’s province in this study, by the request of the client.

Province Size							
Province	Population	Sample Size - Expected	Sample Size - Observed	Expected minus Observed	Sample Size % - Expected	Sample Size % - Observed	Sample Size % - Difference
